

A modern outdoor courtyard featuring a swimming pool with a geometric tile pattern. In the foreground, there is a wooden deck made of solid wood planks and a low wooden bench. To the left, a blue metal frame structure is visible. In the background, a white building with large windows and a hammock is situated. The scene is brightly lit by sunlight, creating strong shadows.

Introducing to who i am

My name is Alessandro Pisanzio, and I have been working as a carpenter for more than ten years. I grew up surrounded by the scent of wood and the passion for craftsmanship, thanks to my uncle's company in Italy, where I first discovered the beauty of transforming raw material into unique creations.

Today, my work is dedicated to tailor-made craftsmanship, where every piece is designed as a small work of art. I believe that wood is more than just a material: it is a living element that carries history, warmth, and character.

Through my creations, I want clients to perceive integrity and durability, qualities that I consider essential for objects destined to accompany people's lives over time.
